Aluminox Electric Fryers

Aluminox double fryer on closed cupboard
FRE702PSC4 2 OIL BASINS / 17 + 17 LITRES on closed cupboard

The Aluminox Electric Deep Fat Fryer is a heavy duty fryer with large production capacity thanks to the ideal combination of tank capacity and heating element power.

The heating elements are tilting for easy cleaning and service. They are connected to a safety micro switch thermostat that cuts off the electrical supply when the heating elements are tilted. Safety features include a back-up thermostat.

On top of the heating elements there is a stainless steel protector that serves as a filter as well. On the rear and on the sides the fryer is equipped with splash guards. The baskets are made of stainless steel and are very heavy duty type.

-On the right basket you can see the s/s protection for the heating elements
