
ELECTRIC GRIDDLES

-Aluminox Electric Griddles

Aluminox Electric Griddles

The Aluminox Electric Griddle can be used to grill a variety of food like meat, fish, vegetables, etc. Its operation is very easy and it is designed to be robust and long lasting. It is supplied with plates made of conductive steel with specially treated surface with 15mm thickness. The heating elements are specially designed to spread evenly the temperature. The temperature is controlled by thermostats from 50°C up to 350°C. The Griddle includes in its standard equipment rear and side splash guards, a removable fat tray and height adjustable legs.

Outside bar showing a pair of table top griddles and table top fryers built in stainless steel 316L

It is a heavy duty model built entirely in stainless steel 304AISI 18/10 with sating finish. The double models have two independent heating zones. The grilling surface can be flat, ribbed or half flat half ribbed for the double models. On the lower part you will find the removable fat tray. You can choose the 700 line griddles to be table top or free-standing, the 900 lines comes as freestanding.
