

Electric water Grills 70-90 Line

- Satin Finish Stainless Steel (front, back and sides)
- Stainless steel Grilling Surface with forward inclination
- Grilling surface comprised of s/s tubes with incorporated Heating Elements for indirect heating and better grilling
- Rear and sides splash Grilling Guards
- Fast & Uniform Grilling throughout the grilling surface
- Hygienic and Tasty Grilling as the fat or oil dropping from the grilled food falls into the water basin with no blazing
- Water Drawer underneath the grilling surface maintains ideal water level directly under the grilling area, so that water optimally vaporizes and the grilled food remains tender
- Water Tap (floor standing models)
- Drainage Valve with Overflow Tube (floor standing models) for connection to drainage
- Integrated Truss keeps the grilling area raised during cleaning
- Electric Box covered and sealed for secure operation
- Grilling Zone Energy Regulators
- Stainless steel legs with adjustable height
